

## IT MANAGEMENT FROM PEOPLE WHO **LOVE & UNDERSTAND** THE CHURCH

Red1's Faith division is truly unique in the IT management space. Our President has years of experience as an IT Director for a megachurch and has helped countless churches of all sizes use technology to reach more people and serve their communities. We KNOW Church IT because Red1 was born from the church.

**BUSINESS & HOME OFFICE IT**

# SOME CHURCH IT ISN'T UNIQUE

Much of the IT needs of the church are the same as other industries. You need a network where devices can connect to the internet, and you fall under data security laws so a plan for cybersecurity is essential.

You need a backup plan if your tech fails, you need experts who can troubleshoot and get you up and running fast, and you need specialists for things like networking, production equipment, check-in stations, access control and more.

That's why IT companies without church experience can, and often do, service those needs

---

**WE BELIEVE IN THE POWER OF  
THE LOCAL CHURCH AND WANT  
TO HELP EQUIP IT TO BE THE  
CONDUIT FOR LIFE-CHANGE.**

---

# WHERE CHURCH IT IS UNIQUE

But everything above must work together with the parts of church IT that are unique.

## Here's where church IT specialists become essential

- Your church database
- Making sure NOTHING gets in the way of an incredible Sunday experience.
- Training, vision casting, and communication of technology using life-giving messaging.
- Text and e-mail strategies.
- Finding solutions that are free or heavily discounted for non-profits.
- Making it easy for people to give.
- Understanding how to develop strategy and SOPs that are volunteer friendly.
- Custom reporting on attendance, giving, connecting with volunteers, etc.
- Custom web applications and programming to make systems talk to each other.
- And of course...keep your buildings and employees up and running.

## WE'RE PLANNING CENTER EXPERTS

Planning Center is the fastest growing and most widely used church management application on the market and Red1 has staff who are experts.

We can talk workflows, lists, automations, API programming, check-ins, and everything else at a deep level.

We've helped churches migrate to PCO, conducted trainings and seminars involving churches from around the country, and can confidently say that if you can dream it, we can almost always find a way to make PCO do it.

## WE UNDERSTAND CHURCH PRODUCTION

If your church relies heavily on audio/visual/lighting (AVL) we have staff who understand it. If you want to talk about complicated systems like Dante, Q-Sys, and more, we know them well.

If you're having trouble with your current environment, want to talk upgrading, or strategy, we're here to help.<sup>1</sup>

## ABOUT RED1

Red1 is a Sarasota/Bradenton, Florida based technology company serving all your office or home-based business IT needs locally and around the country. We have been active in our community for more than a decade and give a portion of our revenue to community-based causes and missions. We offer special non-profit pricing and are proud to offer no haggle, transparent pricing found on our website. (You don't have to "call for pricing.") All our services have no or under 1-year contracts.

We are big enough to have specialists ready to serve you but small enough that you will know our team by name...and we will know you.
